

GIFTED EDUCATION

The Gifted Education Program at Aquinas Catholic College focuses on a student centred approach to education and learning. In Years 7, 8, 9 and 10 gifted students are identified through a variety of assessment tools and then invited to take up a position in our Challenge class.

All students have the opportunity to excel academically through the College's differentiated curriculum and assessment program where students learn at their own pace. Extension English classes challenge students in Year 10 and many students participate in our Enrichment Mathematics Program.

The following strategies are implemented to extend and challenge students: pre testing, compacting, tiered instruction, negotiated contracts, mentoring, independent studies / research projects, small group work, negotiated curriculum.

The Resource Centre also provides an environment where extension and enrichment programs can be studied.

Programs include:

- Picture Book Unit (Combined Yr 1 / 2 and 9 Red)
- Writing Workshops
- Challenge Days
- Night of the Notables
- Independent Learning Projects
- Competitions such as The Science IQ Quiz, Crystal Growing, Aurecon Bridge Building Challenge, Science & Engineering Challenge and Chess Competitions
- The "90's Club" - for those senior students working towards an ATAR above 90
- Challenging Minds Activities.

Other opportunities include:

Southern Region Maths Challenge Days, Philosophy Cluster Days, Engineering Challenges, University of Wollongong Science Fair, Theatre experiences, Best of the Fest Writers Day.
